Team Building Through Chemistry Workshop

Teams are unavoidable in any business. The key to successful team building is addressing the importance of chemistry between team members. It is not enough to have a group of people work on a project; people have to connect and balance each others' strengths. By staying aware of the chemistry as you build the group, you will increase the chance of avoiding pitfalls and developing a sense of unity.

With our "Team Building through Chemistry" workshop, your participants will discover the specifics of how building a team through chemistry will lead to success.

Workshop Objectives:

- Understand the team development model
- Identify team chemistry
- Create vision and goals
- Appreciate diversity
- Manage conflict
